

**rosplast**

**International Exhibition  
of Machinery and Materials  
for Plastic Products  
Manufacture**

**17–19 June 2025**

Crocus Expo, Moscow, Russia

From Ideas  
to the Finished  
Product

# rosplast

**Rosplast** is the key and actively developing exhibition for the plastics industry. It demonstrates modern machinery, various materials and technologies for manufacturing and recycling of plastic products. Its constantly growing exposition and unique target audience create favorable conditions for interaction of business partners, business development and growth of the polymer industry in Russia. Rosplast is supported by The Ministry of Industry and Trade of the Russian Federation, the Association of Plastic Processors of the Russian Federation and The Russian Chemists Union.

## Product groups

Materials

Machinery and Technologies

Production Automation

Contract manufacturing of plastic products

Recycling

## Facts and figures\*

### Exhibitors

**504** exhibitors from **10** countries

**+42%** exposition growth compared to **2023**

**96** Russian manufacturers

**58%** International exhibitors

**38%** new exhibitors

**92%** confirmed their participation in **2025**

### Participating countries

Azerbaijan

Belarus

China

Germany

India

Iran

Jordan

Russia

Taiwan

Türkiye

### National pavilions

China

Iran

Türkiye

### Visitors

**10 683** unique visitors

**+6%** visitors' growth compared to **2023**

**80** regions of Russia

**28** countries

**57%** new visitors

**40%** regional visitors  
(excl. Moscow and Moscow region)

\*According to the cumulative data with Rosmould 2024.

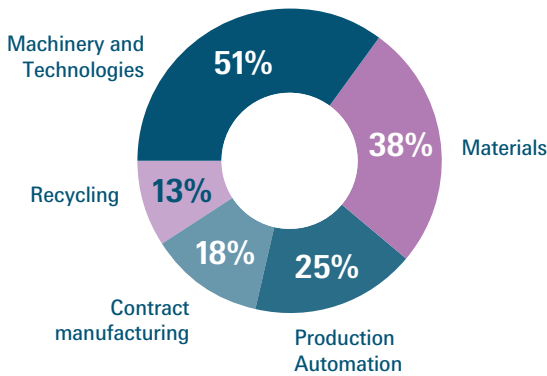

## Visitors' Business Sectors

General mechanical engineering	13%
Packaging	11%
Consumer goods	9%
Chemical and petrochemical industry	8%
Automotive	8%
Electronics and electrical engineering	7%
Construction	7%
Medical industry	6%
Aerospace industry	4%
Defense industry	4%
Waste processing / Recycling	4%
Energy	3%
Agriculture	3%
Appliances	3%
Research institutes / Educational organizations	3%
Consulting / Services	3%
Shipbuilding	2%
Jewelry industry	2%
Unions / Associations / Professional associations / Media	1%

## Position in the company

Division manager / Head of department	26%
Owner (co-owner), self-employed	20%
Engineer / Designer / Technologist	19%
Manager / Marketer / Specialist	15%
Managing director, CEO, Deputy managing director	12%
Freelancer	4%
Student	3%
Non-working	1%

## Visitors' interest\*

## Purpose of visit

Looking for new suppliers / new business contacts	21%
View / get to know trends, new developments, new products	19%
View / get to know new products, services, solutions for manufacturing and business	17%
Expand specialist knowledge	12%
Develop existing business relations	11%
Conduct purchases	8%
Workshops	5%
Business programme	4%
Personal interest	3%

\*Several options were possible.

## Business programme

4 Conference areas

20+ events

140+ speakers

**PlastForum –  
Forum of the Plastics  
and Recycling Industry**

Co-organizer:

ALSO, WITHIN THE FRAMEWORK OF ROSMOULD & 3D-TECH 2024:

**International Tooling Forum**

Partners:

**3D-TECH Additive Technologies Forum**

Within the framework of the Forum:

- Technologies day
- Mechanical engineering day
- Medicine day

**Conference  
on Mould Design  
and Injection Moulding**

Organizer:

## Exhibitors' feedback

**Alexander Dokuchaev**  
Head of representative office  
BORCHE Machinery

It is clear that the exhibition is developing. Each year there are more and more participants, and they are completely diverse: both premium segment and quite budget options. There are a lot of new clients who are interested in equipment. And I can happily say that a number of protocols of intent for the development of production in Russia have already been signed. Many thanks to the organizers for their work!

**Sergey Trifonov**  
Head of Polymer Academy  
Training Center

The exhibition, as always, has been equal to expectations – it grows every year. A large number of visitors, even on the third day; many companies that are starting to move from simply selling other companies' products to their own manufacture. In addition to the fact that we participated with a stand, we also helped to organize the Business program, which this year was even more successful than last year. Next year, we are planning to develop it as well. And we will definitely take a stand in 2025, because at Rosplast we receive a large number of leads for the next six months until winter.

**Alireza Jafari**  
Chairman of the Board  
Eurasia Trading Co., Pavilion of Iran

If we talk about Rosplast exhibition itself, I have been participating in it for several years now and I see that every year there is constant growth. This year it could be seen both by the number of visitors and exhibitors. As for our plans for next year – of course, we will participate in the exhibition. The Iranian pavilion has been participating in Rosplast for 3 years already, and its area is growing every year. Two years ago it was 200 sq.m, last year – 500 sq.m, and this year we have occupied an area of 800 sq.m.

**Waldemar Birkle**  
Development Director  
Biwatech

The exhibition was interesting. Of course, the people who come to our stand are mainly goal-oriented and they know exactly what they want. They are interested in technology, they know all about injection molding machines... We have had many constructive, useful negotiations during the exhibition. Our wish to the organizers is to continue in the same spirit and to develop further!

## Together with the exhibitions

### rosmould

International Exhibition for Mould, Tool Making and Manufacture Technologies

### 3D-TECH by rosmould

International Specialized Exhibition of Equipment and Materials for Additive Manufacture

## Exposition plan

17–19 June 2025

Crocus Expo  
Pavilion 1  
Halls 1, 2, 3, 4
