POWERING PROGRESS THROUGH PLASTICS

STAY AFFIRMATIVE AND AMBITIOUS

The 7th of December 2023 was a memorable day in the history of PLASTIVISION India as this show was the largest “Make In India” show of the plastic industry held at NESCO, Mumbai. 93% Exhibitors were of the Indian origin.

HARPAL SINGH
CHAIRMAN PLASTIVISION INDIA 2023

All the exhibitors were very excited and optimistic, as the four-year gap since the last PVI show entailed more demand and business opportunities. The popularity of brand PLASTIVISION was further proven with a huge footfall of 2,34,000 visitors during the event.

PVI 2023 was not merely an exhibition. It was the outcome of the dedication of an experienced PVI team who are also business owners and professionals, and serve as honorary members. The event was driven by passion and commitment, the stage was set for an extraordinary showcase of innovation and global participation. The exhibition ground was transformed into an arena of ideas and opportunities.

This meticulously crafted event included an exhibition par excellence, the CEO Roundtable, Global Conference, International Buyer-Seller Meet, a key pavilion emphasizing the role of plastics in the medical industry, Recycling Pavilion, Consultant Clinic, Essay Competition, and AMTEC.

I extend my deepest gratitude to all exhibitors and visitors for their trust and participation, transforming this event into a pivotal B2B convergence.

I heartily thank our NAB chairman, Mr. Arvind Mehta, for his guidance and support, and our co-chairmen Mr. Chandrakant Turakhia and Dr. Asutosh Gor, for their sincere efforts throughout the event.

I also thank AIPMA president Mr. Manish Dedhia, all the office bearers and PVI Committee chairmen, and their teams for their support.

We believe that through a healthy combination of vision and common sense, we can overcome various challenges, and establish a powerful, new era of responsible plastics.

INAUGURATION

LIGHTS. STALLS. ACTION.

The curtain raiser of Plastivision India 2023 was a flourish of banners, applause, and inaugural speeches by leaders of the industry. Mr. Manish Dedhia, President of AIPMA, commenced the proceedings. He was optimistic about record turnout and the concomitant business opportunities. He was impressed with the number of business visitors registered for the 12th edition of the exhibition, stating, "It's a celebratory moment for the industry since we are expecting a huge number of visitors from 20+ countries to meet the exhibitors here. This level of business defines Plastivision."

The chief guest of the event was Mr. Prabh Das, CEO of HPCL-Mittal Energy Limited (HMEL), an energy and petrochemical venture. Mr. Das highlighted the importance of a longstanding association with AIPMA. He emphasised that plastics exports are on the rise and present future opportunities for the burgeoning Indian economy. He also emphasised that the plastics manufacturing industry is a net positive for the environment, and that the major problem with the plastic lifecycle lies in waste disposal and recycling.

“ The plastics industry is at the forefront of innovation, sustainability, and collaboration which is the holy trinity of good business. PVI 2023 is an international trade fair of unparalleled magnitude for our industry, with not just a showcase of products and services, but a comprehensive platform that united 1,238 exhibitors. This year, there was an additional 20% exhibition area offered as a global stage to the stakeholders. I want to congratulate the 46 honorary board members who have contributed to the massive success of PVI 2023, under the able leadership of Harpal Singh, who is a marketing champion! ”

ARVIND MEHTA

GC Chairman, Plastivision India 2023

Other dignitaries, such as Mr. Ajay Shah, President of Polymer Chain in Reliance Industries, & Mr. A.S. Sahney, Executive Director of petrochemicals in the IOCL, also spoke on important sustainability issues in the industry, setting the primary theme for the event.

Another upstanding guest of honour was Mr. M Kumar, Managing Director of Shibaura Machine India. He stated that platforms like PVI provide opportunities to the manufacturing sector that cross borders, industry, and technological barriers. He continued, “Such events get the best out of the manufacturers. On an international level, new advanced machinery is being manufactured on a large scale that will transform the sector in a big way.”

Mr. Arvind Mehta, chairman of the National Advisory Board for PVI 2023, highlighted that PVI 2023 was an international trade fair that unites several industries under the purview of plastics, and was not just a showcase of products. He mentioned that the 35 road shows used to market the exhibition were attended by 16,000 people, which multiplied mindshare to record levels. While congratulating all the dignitaries present at the event, he credited the 46 honorary board members, who contributed immensely to the success of the event.

VISITOR REGISTRATION

Moving into 2023, AIPMA had ensured that the 12th edition of its flagship exhibition would swell to record number of business visitors. It was an event planned to work across generations, borders, and industry. Almost 40,000 sq. mts. of exhibition space was allotted, projecting a 30% increase in exhibitors over 2020. Through the hard work of its members, Plastivision India (PVI) 2023 retained its reputation as the 5th largest generator of business activity in global plastics. In the background were extensive branding and visibility campaigns amongst the target audience across India, both offline and online.

BUSINESS VISITORS 2023

234,000+ from 68+ Countries

Owners, managing directors, production managers, and company reps gathered to meet, attend workshops, and experience the technical extravaganza. Team PVI made sure the program was in position for improvements. A large 69% percentage of the visitors came in for the three chief segments of the business: raw materials, moulding, and machinery.

Business inside was such a rousing success that many exhibitors expressed interest in booking space for the edition of Plastivision India in 2027.

MEDIA

AIPMA wanted to promote the Indian plastics sector on a larger scale. PVI 2023 was already fully booked and had a waiting list of exhibitors months before its commencement. We held 35 roadshows all across India, especially in the metropolitan cities, which garnered a good response. Our B2B Meet also caught the attention of 102 delegates from 26 countries. The benefit was that we not only displayed products and machinery, but also broadened our offering with a Medical Pavilion, Recycling Pavilion, Consultant Clinic, Job Fair, and more. ”

MANISH DEDHIA

President, AIPMA

AIPMA kicks starts its 12th edition of Plastivision India 2023, witnessed participation from 30 countries along with 60+ international exhibitors

The media team, spearheaded by our current AIPMA President Mr. Manish Dedhia, undertook extensive operations to ensure PVI 2023's success. In the interim years between exhibitions, the team worked tirelessly with governmental conferences, international exhibitions, industry periodicals, billboards, vehicular advertisements, journalists, and news channels. AIPMA set up stalls at K Show 2022 in Düsseldorf, and at Interplas 2023 in Birmingham. They also leveraged the medium of industry influencers and social media platforms to create more buzz around the event.

With one of the fastest growing economies in the world, India remains a ripe destination for the plastics industry. Our young demographic, the vibrancy of our entrepreneurship, and our tireless energy to shape corporate ecosystems attracts even more technological infrastructure and foreign investment.

At the forefront of this progress stands the All India Plastics Manufacturers' Association (AIPMA) the organiser of Plastivision India 2023. AIPMA chooses to bolster the nation's economy and foster employment and technological innovation through this vessel of Plastivision India. The exhibition urges the industry to further the cause of Indian self-reliance.

Roadshows

ACROSS INDIA AND NEIGHBOURING COUNTRIES

CHANDRAKANT TURAKHIA

Co-Chairman, Plastivision India 2023

RECORDS THROUGH ROADSHOWS

“ Even before the event, the response was at record levels, due to the optimism and bustle at our roadshows. As I networked with business visitors through the first three days of PVI 2023, the feedback was even better. Indian companies are meeting the spirit of Atmanirbhar Bharat. The trust in Indian machines is at an all-time high, for their superior durability, maintenance standards, and quick delivery times. There might be a future where the Indian plastics sector is compared to China's! ”

A total of 35 roadshows were organized to promote awareness for the exhibition, from August 2023 to October 2023. This campaign was instrumental in generating awareness across India amongst thousands of visitors. Other visitor promotion campaign meticulously planned by leveraging social media platforms and by engaging with the industry influencers.

AIPMA's objective was to unite stakeholders from various sectors of the broad plastics industry. Particular emphasis was given to Maharashtra-based roadshows in Mumbai, Pune, Nagpur, Jalgaon, Aurangabad, and Malegaon to penetrate deeper into the regions of Maharashtra. This was a testament to the significance and impact of our exhibition in the industry.

THE AIPMA AGENDA

“ For the last ten years, the plastics sector has had a steady annual 10% growth, even through the COVID pandemic. Plastic was a global saviour, instrumental in the manufacturing of personal protective equipment (PPE) kits. India’s per capita plastic consumption has also steadily grown since, which means there is even more scope in the market. PVI 2023 was an ideal platform for the rise of the Indian plastics sector, through the latest automation, technology, and machinery all under one roof. ”

MAKE IN INDIA - MAKE FOR THE WORLD' AN AIPMA INITIATIVE, WHERE 553 IMPORTED PLASTIC PRODUCTS WERE ASSESSED FOR DOMESTIC PRODUCTION AT PVI 2023. THAT'S HOW INDIAN PLASTICS WILL GET TO THE NEXT LEVEL!

PLANNING THE SHOW

1,238

Exhibitors

The exhibition was designed with a dynamic, multi-dimensional experience in mind for exhibitors and visitors. The NESCO Centre was well-equipped with powerful mobile network reception, free Wi-Fi, free drinking water, golf carts and parking space. Additionally, all the halls and pathways were under CCTV surveillance. The venue offered quick connectivity via the Metro in addition to the other modes of transportation, making the event easily accessible.

6,500+

Volunteers & Contractors

50

Food Court Counters

The Ground Committee, under the able guidance of Mr. Ajay Desai, focused on pre-exhibition build-up activities to ensure that our exhibitors got a seamless experience. Their booths were constructed in time, and additional services were delivered as per the agreed timelines. All the minute details were smoothed out i.e. for labour, toilets, F&B, electricals, security, housekeeping, etc. In total, there were 35 agencies and 70 contractors.

PRASHANT BAHL
Chief Executive Officer
Plastivision India 2023

“ We fine-tuned activities for business visitors and exhibitors and planned the event in a meticulous manner, where the requirements of the audience were met in such a way that surpassed their expectations. At the event itself, there were no hitches. Food, water, knowledge, and business were in abundance. Help was always just a few metres away! ”

“ I would like to thank all our team members who worked behind the scenes of this exhibition, and specifically the ground preparation team, they did a splendid job. There were substantial preparations made for the convenience of the business visitors expected for the show. All credit to the honorary team members who always work for the betterment of the Plastics Industry. The NESCO venue’s team were supportive, too. ”

Mr. HISHAM TAHA NOAH

Executive Director
Al-Khaleej Al-Amerah Trading Co.
Saudi Arabia

“ I came to check out machines and master batches and I am very happy to see all the possibilities that we can work with. ”

Mr. SWAMINATHAN

Telangana & Andhra Plastic
Manufacturer's Association
(TAPMA)

“ Plastivision was planned so well, it played a crucial role to promote and grow the plastics industry. They are the best. ”

INTERNATIONAL BUYER SELLER MEET

Between 8th and 10th December, the International Buyer-Seller Meet bridged the gap between international buyers and Indian sellers. The exhibition had assigned a dedicated space lined with private booths to facilitate interactions between buyers and sellers to boost exports.

Over 400 exporters represented an entire range of the industry from manufacturers of polymers, compounds, masterbatches, films, sheets, chemicals, moulds, and machines to recycled materials. More than 100 meetings were conducted according to Mr. Jayesh Rambhia, chairman of the event. In total, 102 international buyers from 26 countries were hosted and they explored B2B opportunities with Indian sellers.

The response was superlative, as several bigwigs from the Indian plastics industry were seen holding meetings in the dedicated booth area. Here buyers and sellers get an opportunity, away from the crowded exhibition area, to hold initial discussions on what their requirements are and what they are looking to source.

Detailing the importance of the need for such an initiative, Mr. Rambhia said that despite India's huge plastic manufacturing industry, it is China which dominates the world market as regards exports. Exports from India make up only 2% of the global industry exports. But he was optimistic that India could bridge the gap with huge manufacturing and sourcing activity in the coming future.

“ When I attended PLAST 2023 in Milan, AIPMA had already planned to showcase the potential of the Indian plastics sector to its European counterpart. With European technical mastery married to India's capabilities to manufacture at accelerated speeds and affordable costs, we would inevitably capture global markets in the next decade. India will not just be famous for its IT and space sectors, but plastics too. At PLASTIVISION, these facts are publicized and many foreign companies are already shifting their vendorship to India. ”

- Jayesh Rambhia, Chairman, Plastivision India 2027

CONFERENCE

GLOBAL CONFERENCE FOR PLASTICS INDUSTRY A DIVE INTO BUSINESS OPPORTUNITIES

Over two days, on December 8th & 9th, AIPMA hosted a 'Global Conference for the Plastic Industry,' which was an opportunity for the 500 participants to find business opportunities. 40 speakers held the pulpit at the conference. The first day centered on 'Technical and Business Sessions', notably addressing plastics recycling, business opportunities in post-consumer recyclates (PCR), biopolymer and compostable plastics.

The second day's focus shifted to 'Innovation in the Plastic Industry and Business Opportunities'. Sessions explored diverse topics such as product design, reverse engineering, metal to plastic conversion and the application of 3D printing in the plastics industry, with a live demonstration. Additionally, speakers examined opportunities in sectors like automotive, medical applications, and electrical and electronics.

The conference successfully fostered audience engagement through panel discussions and live demonstrations, creating a platform for networking and knowledge exchange.

AIPMA expresses gratitude to all the participants, sponsors and the speakers for their invaluable contributions, marking the event as a significant milestone in the ongoing evolution of the plastics industry towards sustainability and innovation. Looking ahead, AIPMA is eager to continue driving positive change in the subsequent editions of the conference.

Plastivision India 2023 reinforced the new era of plastics business through responsibility in the global circular economy. Regardless of place of residence and date of birth, our stakeholders enjoyed a rich imparting of knowledge, entrepreneurial potential, and high-end equipment in the realm of recycling and its related processes, through the five-day proceedings.

INTERNATIONAL PROMOTIONS

In the months leading up to PVI 2023, the exhibition's lead team worked hard to promote it at the world's major plastics exhibitions. By setting up stalls at these events, PVI's far-acting benefits were explained to the relevant target audiences. Presented here are their efforts at K Show 2022, Interplas 2023, Saudi Print & Pack 2023, and several other marquee trade shows of the industry.

NATIONAL ESSAY COMPETITION

A FRESH PERSPECTIVE ON PLASTICS

“ We have been working on this contest for the past six months, travelling across India. There is an incorrect perception amongst young generations about plastics and not to use them. The main purpose of this contest was to change this perspective and present to them the ground realities on how the plastic industry works. That’s how we streamline the public’s technical knowledge on these polymeric materials for the future! ”

The essay competition was an eye-opening event that students across the nation participated in. There were four topics presented to the students: ‘Plastic: Waste to Wealth,’ ‘Plastic: Its Role in Circular Economy,’ ‘Plastic: A Wonderful Material,’ and ‘Plastic in Medical Application.’ Above 4,000 entries were mailed in, which were sorted according to their regional catchment area: East, West, North, and South. Three entries from each zone were awarded, coming to a total of 12 prizes.

Mr. Mahendra Parmar, the chairman of the Education Committee of PVI 2023, personally shortlisted several entries, presided over the award ceremony, and made speeches regarding the concept and philosophy behind the contest. “Nothing is a waste on our mother Earth,” was one of the poignant lines written by a student, which perfectly summarised the sentiment surrounding the event.

CEO ROUNDTABLE

The event featured a large delegation of CEOs from major Indian plastics companies. The main agenda was India's self-reliance in plastics goods exports. The CEOs strategised on how to bring the industry's export growth to INR 1,60,000 crores by 2030, from the current INR 40,000 crores. One other major topic that circled the roundtable was sustainability. With the entire world seeing plastics as a threat to the environment, the roundtable highlighted the need to have sustainability and prove to the world that the plastics sector is not a threat.

The chief guest was Ms. Nivedita Shukla Verma, secretary of the Government of India's Department of Chemicals and Petrochemicals. Her insights and vision contributed greatly to India's ten-year vision on sustainability and innovation within the plastic industry. The leaders also seek opportunities to have funding from the government as they have plans to focus on the 'Make in India' approach when it comes to waste management.
